Response to Amendment

1. The amendment filed on September 4, 2003 has been entered.

Information Disclosure Statement

2. The V. Perez-Mendez reference has been considered. This reference was cited in a previous IDS but was not considered due to the lack of date, however, the applicant pointed out that the reference date was cited in a specification.

Allowable Subject Matter

3. Claims 12-22 are allowed.
4. The following is an examiner's statement of reasons for allowance:

None of the prior art of record specifically discloses the layer technique as claimed in the instant application, namely that there are alternating layers of semiconducting material and another material, i.e. insulating or conducting, that provide a detector to detect incident and secondary particles. Further none of the prior art of record discloses the specific different layers of material, as these materials offer a means for predisposing a specific particle collection path. Although references such as Nelson disclose many of the same elements as in this instant application such as alternating layers, Nelson does not distinguish the different materials necessary for the semiconducting material and the first material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
